

# Guide Sheet: Hybrid Cloud

DYOPATH is here to help you with your Hybrid Cloud strategy. Our Hybrid Cloud solutions combine a private cloud with one or more public cloud services, with proprietary software enabling communication between each distinct service. Our strategic approach provides organizations with greater flexibility by moving workloads between cloud solutions as needs and costs are rapidly changing.

## Why Clients Choose DYOPATH hybrid Cloud

### Innovate Faster

DYOPATH'S Hybrid Cloud solutions bring agility to applications and data throughout your organization, eliminating complexity and silos, driving speed and agility with common tools, processes and automation.

### Control

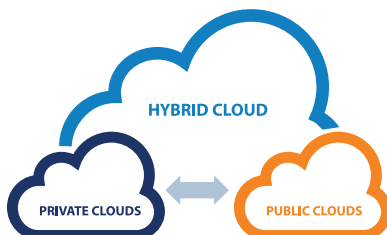

DYOPATH'S Hybrid Cloud solutions give you better control by allowing you to customize the private end of your hybrid cloud model to meet your specific needs and adjust them accordingly as needed. Our hybrid approach allows internal IT staff the ability to retain control of critical operations as needed.

### Scalability

With DYOPATH'S Hybrid Cloud architecture, your organization can have the best of both worlds (public and private). Critical operations, data and assets can continue to reside in the private cloud, but organizations can now leverage the expansive power of cloud computing to quickly scale their operational capacity.

## Improve Your Productivity with Orchestrated Cloud Platform Solutions

Your organization demands connections that are faster, more complex and always available. DYOPATH'S Hybrid Cloud architecture offers an easy, efficient and secure way to meet the needs of your business.

- ✔ **Storage Diversification**  
 DYOPATH enables your organization to incorporate a combination of diverse platforms including public clouds and private clouds by providing a wide range of hybrid cloud storage options.
- ✔ **Solutions Flexibility**  
 Our solutions are flexible as our hybrid approach enables you to provide resources when and where they're needed while minimizing the expenses required for always-on capabilities.
- ✔ **Cost Savings**  
 Our Hybrid Cloud solutions drive significant cost savings by replacing multiple solutions taking into account hardware, training and maintenance time. Savings are found through improved ease of use and improved scalability.
