

Guide Sheet: Ongoing Support

DYOPATH has worked with many public and private schools and school districts to help them align information technology with their strategic plans. Our team of experts understands the challenges educators face every day. DYOPATH has the experience your school needs in providing Ongoing Support for a range of needs including managing your wireless environment, providing a stable network to allow educators to deliver lesson plans or securing and maintaining your network.

Why Clients Choose DYOPATH for Ongoing Support

Accountability

DYOPATH focuses on all learners. By understanding the educational and operational impact of technology, we design a customized support structure to reach your goals.

Resources

Technology has become incredibly complex and mission-critical in a school district. DYOPATH has the necessary resources to tackle any issue by leveraging a team with over 150 certifications covering districts across the country.

Expertise

DYOPATH has the experience of working with multiple districts across the country. When there is an escalation or need for specialized support, DYOPATH has the expertise to address the issue.

You Focus on the Classroom. We Manage IT.

Using our Ongoing Support throughout your district means that your personnel can focus on educational initiatives that benefit the community.

✔ Customized

We create a customized IT strategy based around your unique needs and goals.

✔ Speed

DYOPATH understands the educational and operational impact of technology issues and operates with a sense of urgency to get them resolved as soon as possible.

✔ Reach

DYOPATH has a US-based Network and Security Operations Center, providing the ability to support our clients around the clock for emergencies or a security breach.
