

Guide Sheet: Advanced Security Services

At DYOPATH we work with the single purpose of helping our clients combat the ongoing increase of cyber threats, the growth in more complex IT environments, and the ever-increasing human capital shortages.

Trusted IT Services

We customize our comprehensive suite of IT services to be perfectly matched with your organization's individual needs, providing unmatched IT protection to help you mitigate risks and losses while staying ahead of threats and productivity.

Advanced Security Services

In an age of extreme cyber-risk and continual threat, compliance is not enough. We deliver complete, secure management systems and processes which are critical to a truly secure environment.

Why Clients Choose DYOPATH for Advanced Security Services

- ✔ **Actionable**
With our actionable protection plans, your organization is empowered with a tailor-made road-map used to secure your networks and critical infrastructure.
- ✔ **Compliant**
Our solutions are guaranteed to meet compliance regulations, whether they are mandated by internal policies, external requirements or both.
- ✔ **Defensive**
We implement customized solutions designed to defend your network and data against viruses, hackers, internal threats, and both targeted and random attacks.

We Deliver Results

Tightened Security Posture

Enhance your organization's security posture with multi-layered protections

Faster Threat Response

Detect and respond to threats in real-time with proactive scanning and remediation

Simplified Policy Handling

Streamline the management of security policy rules, procedures and enforcement

Layered Security You Can Count On

True security is not achieved in a single action, but in a multi-faceted solution. We design and deliver the tools to securely access information and applications, creating and maintaining a security posture that instills confidence throughout your organization.

Comprehensive Risk Assessments

Gain insight into your unique security vulnerabilities as we develop a prioritized risk-resolution approach.

Proactive Security Awareness

Solutions designed to not only be reactive, but proactive, minimizing threats before they can occur.

Expert Security Engineers

Our seasoned, certified engineers bring you peace of mind with their deep security expertise.

Services Offered
