

Guide Sheet: Energy

DYOPATH is a management consulting and information technology firm that specializes in supporting a wide variety of operational needs for electric and gas utility entities. Our pioneering involvement with energy deregulation, organizational analysis, process improvement, real-time systems, and cyber and physical security research and development has distinctively established DYOPATH as a leading-edge firm in the industry.

Trusted IT Services

Our utility industry team members come with an average of 27 years of engineering and security experience; in other words we speak the language of the industry. We understand both the business and technical perspectives of utility organizations enhancing our ability to effectively frame risks, communicate with internal management and staff, and assess the operational impact of alternatives. This experience, coupled with our expertise in addressing NERC reliability standards, uniquely qualifies our team to support utilities in a variety of security and operational program assignments.

Specific Services Include

- SCADA/DCS Security Assessments & Penetration Audits
- NERC CIP Cyber Security Standard Compliance Programs
- Policies / Procedures / Secure Network Design / Physical Security
- Risk Management Services
- IT Outsourcing Services
- Business Continuity and Disaster Recovery Planning
- Strategic IT Systems Planning
- Systems Integration
- Business Process Optimization

Our clients include some of the largest utility entities in North America. Our success has been attributed to our excellent customer service philosophy and our forward thinking approach in supporting our customers' business and technology objectives.
