

COMPUTER SECURITY SERVICE

Guide Sheet

We protect your business from threats with our DYOGUARD Computer Security Service built for modern businesses.

✓ SECURITY PROGRAM MANAGEMENT

Our Security Program Management services guide your security plans to match your business goals. We help you build a security plan that works with your business, not against it.

- Security Training
- Virtual Chief Information Security (vCISO)

✓ VULNERABILITY MANAGEMENT

Our Vulnerability Management solutions find, sort, and fix security flaws across your IT systems. We don't just find problems – we solve them.

- Autonomous Pen testing
- Host Based Vulnerability Management

✓ DARK WEB

Our Dark Web protection services watch shadowy online places to find leaked data before it can hurt your business. We look in places most people can't access.

- Dark Web Monitoring
- Executive Risk Management

✓ ASSESSMENTS

Our security assessments check your entire security setup to find weak spots before hackers can use them. We look at every part of your system.

- Governance & Risk Compliance (GRC)
- Penetration Assessment
- Regulatory Compliance
- IT Assessments
- Compliance Assessments

✓ MSSP

Our Managed Security Service Provider (MSSP) solutions offer top-notch protection with 24/7 monitoring and threat detection. We stay on guard so you can focus on your work.

- Endpoint Detection and Response
- SIEM & SOC as a Service
- SOAR (Security Orchestrations Automation Response)
- Managed Email Security (DLP&DMARC)
- Incident Response
- Data Security
- Security Awareness Training
- Vendor Risk Management
- Executive Risk Management
