DYOGUARD

ENDPOINT DETECTION & RESPONSE

Guide Sheet

Every click, every connection, every device: your endpoints are where cyberattacks strike first. DYOPATH's Endpoint Detection & Response (EDR) service delivers always-on monitoring, intelligent detection, and immediate response to isolate and contain threats before they spread. With DYOGUARD EDR, your team can focus on business growth while we keep attackers out of your systems.

WHY CLIENTS CHOOSE DYOPATH FOR
ENDPOINT DETECTION & RESPONSE

Learn more about DYOPATH and discover why organizations trust us to protect their endpoints from advanced cyber threats. Our certified security experts bring deep experience in threat hunting and incident response across all device types.

🔒 RAPID RESPONSE

Contain and remediate threats before they disrupt operations.

🛡 REAL-TIME DETECTION

Spot malicious activity the instant it appears.

UNMATCHED PROTECTION

Leverage enterprise-grade tools and expert oversight to secure every endpoint.

CONTINUOUS MONITORING AND RAPID RESPONSE TO
STOP THREATS IN THEIR TRACKS

Endpoints are the doors to your organization. DYOPATH ensures those doors are locked tight—if someone tries to force their way in, we're there to stop them instantly. Our continuous monitoring and fast-acting response keep your devices, data, and people protected against ransomware, insider threat, data loss prevention, and advanced persistent threats.

DETECT

Identify anomalous behavior in real time across every endpoint.

RESPOND

Enhanced by AI, swiftly contain and eliminate threats before they escalate.

STRENGTHEN

Use actionable insights to fortify defenses, prevent zero days and repeat attacks.
