Never One-Size-Fits-All, Always Working For You

Gone are the days of out-of-the-box, DIY firewalls and anti-virus software. For today and for the future, your organization needs a cybersecurity partner capable of more than just reactive defense.

You need a partner that can proactively anticipate and eliminate threats while staying ahead of evolving breach tactics to safeguard your systems before malicious actors attempt to access your data.

	DYOGUARD Protect Get powerful tools, streamlined processes, and experienced people looking out for your organization. Implement incident response actions with your own team.	DYOGUARD ProtectPro Ideal for teams with some compliance needs or who require visibility into their security operations. Get DYOGUARD's renowned experts, processes, and tools, including a dedicated security analyst and live advisory support.
Managed Detection & Response (MDR)	✓	✓
Managed Email Security (MES)	✓	✓
Security Reputation Monitoring (SRP)	✓	✓
SOC as a Service	✓	✓
Incident Response	✓	✓
Security Awareness & Training	✓	✓
Dark Web Monitoring (DWM)		✓
Extended Detection & Response (XDR, Enhanced SIEM)		✓
Physical & Virtual Network Traffic Analyses (NTA)		✓
Vulnerability Scanning		✓
Automated Penetration Testing		✓
Dedicated Security Analyst		✓
Live Regularly Scheduled Security Advisory Meetings		✓

DYOGUARD Protect has your organization covered, protecting your brand, critical assets, and even your reputation on the dark web.

DYOGUARD ProtectPro includes XDR, which enhances SIEM technologies to offer a more holistic approach to cybersecurity. It not only detects threats but also automates the investigation and response process before our SOC Analysts begin their investigations.

Everything you need to meet your organization's unique governance requirements and business goals.

- Company-wide Security Awareness Training
- Ransomware Assessment
- End-User Risk Assessment
- Breach Attack & Simulation
- Attack Validation
- Security Posture Assessment
- Cloud Control Attack & Security Audit
- Network/Data Assessment

DON'T JUST WAIT FOR AN ATTACK! PREDICT & PREVENT WITH DYO GUARD

DYO GUARD Protect

Our Blue Team safeguards organizational assets by aligning with your business objectives, meeting you where you are today, and continuously improving your security posture.

We identify vulnerabilities and preempt potential security incidents with deep scans, comprehensive monitoring, and ongoing risk intelligence analyses. Regular security scans and assessments are conducted to fortify defenses on your devices to ensure you are safe and secure 24x7x365.

Whether in email, on the clear web, or on the dark web, we proactively monitor your organization's digital footprint, protect your VIPs, and let you know when we detect hidden threats to your reputation, brand, and staff.

DYO GUARD ProtectPro Insights

Get true insight into every aspect of your business, including BYOD, corporate devices, email, and servers. DYO GUARD ProtectPro provides the data and critical contextual awareness you need to design and execute an effective cybersecurity strategy.

With DYO GUARD, you'll receive continuous validation that true insights are actively shaping new protective measures throughout your organization.

Our Red Team specializes in regular pen testing and exploitation simulations, ensuring your defenses are rigorously tested and fortified against real-world threats.

Strategic Breach Simulation

Want assurance that your system can withstand an attack?

Supplement our DYO GUARD ProtectPro or Protect plans with our Breach Simulation Package, which goes beyond prevention and protection – it's an active evaluation of your defenses. We synchronize data and analyze events to uncover patterns, risks, and vulnerabilities then attempt to actively exploit them in hopes of improving your policy, procedure, and systems.

With Active Pattern Intelligence and Pattern Recognition, our Purple Team conducts continuous red teaming exercises and optimizes blue team responses to enhance your security posture.

DYO GUARD Strategic vCISO

When you are ready to up your game, we can design and host comprehensive employee education programs to raise awareness of potential cyber threats across all levels of your organization. Whether it's your C-Suite or accounting, we've got you covered.

Get everything you need to meet your organization's unique governance requirements and business goals with a dedicated DYO GUARD virtual CISO, including::

- vCISO Support & Cybersecurity Consulting
- Business Impact Analysis (BIA)
- Security Posture Assessment (SPA)
- Business Continuity Planning (BCP)
- Incident Response Planning (IRP)
- Policy Development
- Specific Compliance requirements, assessments
