

Guide Sheet: Security Programs

DYOPATH provides Security Programs that include your organization's critical information security policies, procedures, guidelines and standards. We ensure your customized security program includes a roadmap for proactive security management practices and controls. Our solutions help your organization ensure the confidentiality, integrity and availability of your data.

Why Clients Choose DYOPATH for Security Programs

Strategic Vision Meets Security

DYOPATH combines elements from its other security offerings to help its customers build a strategy for its security program.

Mature

DYOPATH'S team of experts can deliver all the components of a comprehensive security program.

Purposeful

DYOPATH can help roll out a Security Program with the right tools and standards for the problems at hand.

DYOPATH Builds the Foundation of Your Security Program

DYOPATH'S Security Programs include multiple components and sub-programs to ensure that your organization's security efforts align to your business goals and objectives.

- ✔ **Benchmark**
We begin by benchmarking the current state of your program as we define your environment needs through your security policies, standards, programs and process documentation.
- ✔ **Measurement**
As we begin to conduct your needed assessments, we measure against your initial benchmark to see how impactful changes to your security program are to your business.
- ✔ **Informed Decision Making**
DYOPATH'S solutions include putting a communication system in place to provide critical data and analysis to key stakeholders in order to make informed decisions moving forward.
