DYOPATH
Driving Your Organization's
**PATH** to IT Success

Guide Sheet: Migration Services

Whether you need to migrate to the cloud or migrate to a more advanced server technology, DYOPATH has decades of experience in providing the necessary planning, testing and migration services that can help your organization save time and money. We understand that migrations are more than just moving data, migrations can involve upgrading to new hardware, new software or both.

Why Clients Choose DYOPATH for Migration Services

Expertise
We deliver systematic, efficient and timely migrations. Stay on track with DYOPATH'S proven combination of tools and expertise.

Planning
Migration planning requires a well-designed project plan with milestones, deliverables and delivery dates in addition to ample opportunity for client reviews, validation and QA.

Migration Services Provided
DYOPATH is here to help you with all your migration needs for: Office 365, storage and data, public/private/hybrid cloud, data center, Microsoft Exchange and new infrastructure.

Expertise and Experience Grounded in Accountability

Our Migration Services provide you the expertise to reduce the time to market and reap the benefits sooner from your new or upgraded platform.

Proven Experience
No two migrations are the same. We've established a proven methodology and customized approach by performing complete migration services for the last 24 years to federal agencies, Fortune 1000 and SMB commercial clients globally.

Best in Class Methodology
We follow industry best practices supported by certified Project Managers following Program Management Body of Knowledge (PMBOK) standards.

Little to No Downtime
We migrate data and workloads with maximum efficiency and little to no downtime. We'll minimize friction during your migration project.
